

Z21 FW V1.20 or higher
LocoNet T (Master) 12VDC, 500mA

L-BUS

LocoNet throttles ←

LISSY automation using IR

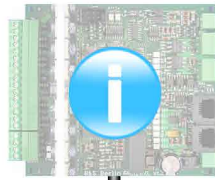

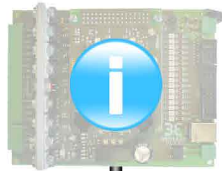

TRAIN-NAVIGATION automation using IR

63100 power supply

63400,63410 input/output module

Visualization in App planned for Q1/2014

Blücher GBM16XL occupancy detector

Blücher GBM16XN LocoNet Interface occupancy detector train detection using RailCom

63320,63340 occupancy detector (2-rail tracks)

LocoNet boosters

BDL168, RX4 occupancy detector using transponding

adapter LocoNet-T (throttle) to LocoNet-B (booster)

These modules must be connected with LocoNet-B interface => adapter necessary

MARCo

63330, 63350
68720, 68730

These modules are not compatible with full bridge power circuits and must not be connected to Z21 or Digitrax command stations.
